Office Action Summary	Application No. 10/811,623	Applicant(s) GIGL ET AL.	
	Examiner Daniel L. Robinson	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Interview Summary

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6, 10, 11, 13, 14, 16, 17, and 19 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Jakes et al.(U.S.Pat.6,909,075).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jakes in view of Ford (U.S.2003/0175156 A1).

Jakes discloses a method and apparatus for heat treatment of raw materials using microwave radiation and a plurality of crucibles but does not explicitly show the crucibles stacked tube. Ford discloses an automatic crucible and sample loading system and method that shows crucibles stacked in a cartridge tube. It would have been obvious to one of ordinary skill in the art at the

Art Unit: 3742

time of the claimed invention to use the crucibles, stacked in a tube as taught by Ford in the device of Jakes so as to provide compact storage and dropped delivery.

Claims 3, 9, 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jakes in view of Ward. Jakes does not explicitly show a crucible made of an alloy of alumina and silicon nitride. Ward discloses a rapidly cast alloy strip having dissimilar portions that shows an alloy of alumina and silicon nitride. It would be obvious to one of ordinary skill at the time of the claimed invention to use an alloy as claimed so as to provide a crucible for sustained operations.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berson is cited to show structure similar to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L. Robinson whose telephone number is 571-272-4788. The examiner can normally be reached on m-f 5:30-2:30.
